Industry	Paints, Coatings & Home Décor
Tagline/ Slogan	Har Ghar Kuch Kehta Ha (Every home has a story to tell / Every home says something about its owner)
USP	Asian Paints centers on its unmatched supply chain efficiency, deep retail distribution network, and emotional brand

Economic Analysis - Asian Paints Limited

India's economic performance during FY2025–26 remained an important driver of consumer demand and business activity. Real GDP at constant prices is estimated at ₹3,23,12,034 crore in FY2025–26, compared with ₹2,99,88,619 crore in FY2024–25, representing growth of around 7.7%. Looking ahead, economic growth is expected to remain strong. Inflation was around 2.8% in FY2025–26 and is expected to increase to approximately 4.6% in FY2026–27. Higher inflation can reduce consumer purchasing power and increase input costs for businesses.

Interest rates are another important factor affecting housing, construction and consumer spending. A stable or lower interest-rate environment can support housing demand and renovation activity, while higher rates may increase borrowing costs and reduce spending. Crude oil prices are also important because several industrial raw materials are derived from petrochemicals, and higher crude prices can increase production costs. Overall, economic growth, housing activity and consumer spending support business demand, while higher inflation, interest rates and raw-material costs can create pressure on profitability.

By 2030: India is projected to reach a nominal GDP of \$7.3 to \$8 trillion in baseline estimates, positioning it as the world's third-largest economy as per S&P Global Market Intelligence and annual real growth rate averaging around 6.7% to 7% and India needs to increase its rate of employment growth and create 90 million non-farm jobs between 2026 and 2030's, for productivity and economic growth according to McKinsey Global Institute.

Industry Analysis - Asian Paints Limited

STP of Asian Paints Limited

Segment	Decorative, International, Industrial, Home Décor
Target Group	Every customer focus, regional products, B2B, homeowners, professionals
Positioning	Being india's largest paint company moving from being "present on shelf" to having a meaningful place in consumers' minds

SWOT ANALYSIS

STRENGTHS

Strong brand
Wide product portfolio
Large customer/distribution network
Strong decorative-paint presence
Products across economy to premium segments

WEAKNESSES

High dependence on Decorative & Home Décor
Need for continuous innovation
Complexity of serving diverse markets
Exposure to changing consumer preferences

OPPORTUNITIES

Expansion in Home Décor
B2B/project sales
Premiumisation
Shift from unorganised to branded products
AI and technology

THREATS

Intense competition
Changing consumer preferences
Input/cost pressures
Risk of market-share loss

PESTEL ANALYSIS

P

POLITICAL

- Housing and infrastructure policies can support paint demand
- GST and tax changes can affect paint demand

E

ECONOMIC

- Inflation can raise costs of chemicals and crude-based inputs
- Interest rates can affect housing and construction

S

SOCIAL

- Urbanization increases housing and repainting demand
- Rising homeownership supports

T

TECHNOLOGICAL

- Digital colour-selection tools can improve customer experience
- Automation can improve manufacturing

E

ENVIRONMENTAL

- Stricter environmental norms can raise compliance costs
- Demand is growing for low-VOC and eco-friendly paints

L

LEGAL

- Compliance with environmental and chemical rules is important
- Product quality and safety standards affect

prices and margins • Import duties can affect raw-material costs • Government housing schemes can support repainting demand	construction activity • Rising disposable income can support premium paint demand • Economic growth can improve decorative paint demand	supports renovation spending • Consumers increasingly prefer premium colours and finishes • Changing lifestyles can increase home-improvement spending	manufacturing efficiency • New formulations can improve durability and performance • E-commerce can expand customer reach	environmental paints • Energy and water efficiency can reduce environmental impact • Sustainable packaging and waste reduction can strengthen the brand	direct manufacturing • Labour laws can influence employee-related costs • Consumer protection laws affect product information and advertising

PORTER'S FIVE FORCES ANALYSIS

Competition Rivalry (High) Berger Paints, Nerolac, JSW Dulux, Indigo Paints, Sirca Paints many companies are chasing some persons therefore for each companiess competition are high amd for companies frequent product launches and brand promotions, Competition on price, quality and distribution and Premium and decorative segments are highly competitive.
Threat of new entrants (Moderate) Threats from entrants is a moderate issue for asian paints because it has massive distribution network, supply chain efficiency,early tech adoption: and strong brand value It is difficult for new entrants to cope with high investment required in manufacturing and distribution,wide dealer and distribution networks are difficult to build also brand reputation gives existing players an advantage.
Threat of substitutes (Low) Threat of substitutes is low because limited direct substitutes for decorative and protective paints and paint remains a relatively affordable method of improving interiors and exteriors. Asian Paints has recently launched range of Furniture, Furnishings and Lighting Products under three brands - Nilaya, Royale and Ador, thus offering wide spectrum of
Bargaining power of suppliers (High) Paint production depends on chemicals, pigments and crude-based raw materials.one another is raw-material prices can fluctuate significantly.and at large scale of Asian Paints provides stronger negotiating power. 90% of the key ingredient in the paint are imported from outside of India and majority of them are derived from crude oil. It shows dependency of paint company on suppliers.
Bargaining power of consumers (Moderate) Customers (both individual consumers and large contractors) have a wide range of choices, which can increase their bargaining power but sian Paints has countered this by focusing on brand differentiation, superior product quality, and a robust after-sales service. The company’s loyalty programs, extensive color palette, and innovative tools like the ‘Asian Paints Visualizer’ app enhance customer engagement and reduce price sensitivity, thereby decreasing buyer power.

S

Asian Paints manufactures, sells, and distributes decorative and industrial paints, while also offering a wide range of home decor and improvement services but holds the leading position in the Indian paint and India's top paint company since 1967 and the ninth-largest globally its market Capitalization: ~\$26.22 Billion USD. The company has 27 paint manufacturing facilities in 15 countries, servicing consumers in over 60 countries. Beyond decorative and industrial paints, the company offers waterproofing, wall coverings, modular kitchens, bath fittings, lighting, and full home decor services. 2,290,000 KL/ANNUM e have installed in-house decorative paint manufacturing capacity in India. Forbes Global magazine USA ranked Asian Paints among the 200 Best Small Companies in the World for 2002 and 2003 and presented the ‘Best under a Billion’ award to the company. Asian Paints is the only paint company in the world to receive this recognition. One of the country's leading business magazines, “Business Today,” in Feb. 2001 ranked Asian Paints as the Ninth Best Employer in India. A survey carried out by ‘Economic Times’ in January 2000 ranked Asian Paints as the Fourth most admired company across industries in India.

Sales

Asian Paints successfully defended its market dominance against the aggressive entry of Grasim's Birla Opus, which launched with a massive ₹10,000 crore investment and disruptive dealer discounts. While the newcomer initially created pressure and triggered fears of market share erosion, Asian Paints mounted a resilient comeback by leveraging its deep-rooted dealer relationships and unmatched consumer brand recall. As end-consumers continued to specifically ask for Asian Paints products, dealers quickly pivoted back to the market leader. Supported by stabilizing raw material costs, a sudden leadership exit at Birla Opus, and a swift 11% surge in its own volumes, Asian Paints effectively neutralized the threat and solidified its long-standing position at the top of India's paint industry.

Recommendation - Asian Paints Limited (APL)

Buy / Hold

Various valuation methodologies have been used to value Asian Paints Limited shares (APL). The DCF and Relative Valuations approach was selected to assess APL. Under the DCF approach, the enterprise value came out to be Rs. 76177.63 crores. EV was Rs 152261.75 crores in Relative Valuation - Domestic Trading Comps, Rs 69586.83crores in International Trading Comps, and Rs 87260.71 crores in Blended TEV.

In order to value APL stock, I allocated the DCF-FCFF approach 80% weight, 15% to RV-Domestic Trading Comps, and 5% to RV-International Trading Comps. Using blended TEV, equity value per share came out to be 653.98 and market value per share was 2640 as at 31st August 2026 which resulted in the gap of -75%. Thus, shareholders should either hold or buy the stock.

Asian Paints holds approximately 52% market share in the Indian decorative paints segment, maintaining its position as the clear market leader and its an extensive direct-to-dealer distribution network that serves over 70,000 to 150,000+ retail touchpoints across India and company bring new Iconic campaigns like "Har Ghar Kuch Kehta Hai" anchor the brand in family values, self-expression, and home transitions instead of functional paint attribute.

Facing input cost pressures linked to volatile crude oil prices and Middle East geopolitical tensions, the company rolled out a cumulative price hike of 6% to 8% throughout March 2026 to preserve operational margins.
